PROFESSIONAL SUMMARY

Full-stack developer with experience in scalable web apps, RESTful APIs, blockchain systems, and data-driven SaaS platforms. Skilled in Python, React.js, Node.js, and cloud infrastructure. Eager to contribute to climate-tech innovation at Varaha through robust, impactful engineering.

EDUCATION

Navodaya Institute of Technology
Bachelor of Engineering in Computer Science
– CGPA: 8.42/10

Raichur, Karnataka
2022 – Present

INTERNSHIP

Full Stack Web Development Intern
Tap Academy (TAP EdTech Pvt Ltd)

Feb 2026 – May 2026
Bengaluru, Karnataka

- Completed hands-on training and internship working on multiple projects using Core Java, Advanced Java, MySQL, and Frontend technologies.
- Gained practical exposure to Full Stack Web Development in a professional work environment.

TECHNICAL SKILLS

Languages: Python, Java, SQL

Web Development: React.js, Node.js, JSP, Servlets, HTML5, CSS3, REST APIs,

Data & ML: Pandas, NumPy, scikit-learn, TensorFlow (Beginner), Jupyter Notebook

Databases: PostgreSQL, MySQL, MongoDB, Firebase

Blockchain: Solidity, Hardhat, Smart Contracts, MetaMask, Web3.js

Tools & Concepts: Git, GitHub, VS Code, Postman, MVC Architecture, Microservices, OOP, Eclipse, DSA

PROJECTS

FashionShop – Online Fashion Ecommerce Web Application | *Java, JSP, Servlets, JDBC, MySQL, Apache Tomcat* 2024

- Developed a full-stack ecommerce web application for online fashion shopping using Java web technologies following MVC architecture.
- Implemented user authentication with registration, login, logout, and session management using Servlets and HttpSession.
- Designed dynamic product listing, category filtering, shopping cart, checkout, order placement, and order history with secure user-specific access control.
- Built a reusable DAO layer with JDBC for efficient MySQL database operations; designed relational schema for users, products, categories, cart items, orders, and order items.
- Created responsive, modern UI using JSP, HTML, and CSS with clean frontend-backend integration and reusable components.

Blockchain Supply Chain Management | *Solidity, Hardhat, React.js, Node.js, MongoDB*

2025

- Built a blockchain-powered supply chain system ensuring end-to-end transparency and traceability — applicable to carbon credit tracking and verification workflows.
- Designed and deployed smart contracts (Solidity, Hardhat) for automated inventory updates and trustless payments; integrated MetaMask for secure role-based transactions.
- Developed React.js frontend and Node.js backend for real-time product tracking with a responsive dashboard.

Mini Projects (10+) | *Python, React.js, API Integration*

2023 – 2024

- Built web tools including a Weather App (REST API integration), Portfolio site (React + Tailwind), and Python data processing scripts using Pandas and NumPy.

CERTIFICATIONS

Introduction to MongoDB – Simplilearn (2025)
Programming – SkillUp (2025)

Basics of Python – Infosys Springboard (2025)

Java

ACHIEVEMENTS & SOFT SKILLS

- **Top 10 Finalist** – HackVyuha Hackathon, B.L.D.E University, Vijayapura (2025)
- **10+ projects** built during college spanning full-stack web apps, blockchain systems, and data tools
- **Soft Skills:** Problem Solving, Critical Thinking, Team Collaboration, Leadership, Communication, Time Management
